The Oxegonian. SATURDAY MORNING, ARRIL 11, 1895

Rumors of war were not so thick yesterday as night have been expected from the situation, as reported from across the Atlantic Thursday night. The only c counstance of real import was the withdrawal of the Russians from Penj-deh after the recent action. This may be taken by England, if a pretext is desired, as a concesresterday showed a more peaceful feeling all Of course the fluctuations point to cametance that consols advanced vesterday in England and that wheat declined The details furnished in another column

surprising is the devotion of the mass of the people in India to the empire In the event of a serious war, it is said that India would furnish an almost impunera-ble host of soldiers enthusisatic for the British cause. An Egyptian, resident in Portland, who has just returned from a visit to England, says that the knowledge of this fact is the secret of that the knowledge of this fact is the sected of British confidence. The Russian government, too, it is said, is 'ally informed of the loyal spirit among the Indians and not prepared to encounter it. Sud from this for-awky point of view speculation is idle. We must simply wait for developments.

During the past ten days there has been a onsiderable development to line with the ealthful business signs to which THF ORE-ONIAN recently called attention. Much then put forth as matter of probability has been acreage is really greater than indicated by earlier estimates, particularly in the eastern sect in of Washington territory, where the planting is reported to exceed that of last year by about 50 per cent. Unless some special inisfortune out of the natural order of things comes noon the country, the grain harvest will be arger than that of any former year. Other nope promise equally well.

ing wave, and in each the farming area is being mlarged and new enterprises are springing into

times it is particularly suggestive. It shows a

nanifest than in Portland Not even du-ing the rankoza "hoom" was there as unch building in progress or in pros-ect in this city as now Even it this early date no less than eight large busiplans are making for residence building in pro-portion. These and other evidences of a revival of business confidence express the feeling of the whole country. We are through with the terrible recoil from the artificial expansion of three years upo, and are again moving forward Quite independent of the European war, of which the mere prospect has added six-conts per bushel to the value of wheat, we are sure of a presperous year and of a greater future

THEIR HANDS ARE TIED

sible to get vegetables, milk, butter and all other products of the farm, the dairy and the orchard to market at rates which encourage industry. Here it is not. Under present arrangements a farmer up the Willamette valley actually loses money if he attempts to ship his produce here in small quantities. As a consequence we buy from far away what we should buy at home. country a drained of mone; the very things which min produced within an honr's time produced be produced within an hoar's time from the city. The countr, too, in its efforts to free itself from bondage to a single crop system which has made it poor, anguishes from the want of a market. The railroad companies have lacked the business sense to turn this situ ation to advantage, and have shown not the sightest indication of public spirit. It is due to the country that some better facilities be of-fered. It may be true that with a limited population we cannot on our own manufacturing but there is no excess for not feeding ourselves

The fault less with the railreads

These remarks are prompted by complaints
which have reached this journal from people in

M. Ferry has been able to administer a acut but sharp robuke to the French chambers for the precipitancy with which they dealt with his government. The day after he was denoted he handed President Grevy a dispatch from the Chinese government accepting his terms of peace. Had the dispatch come a day eather and bad the reports of defeat at Dong Dong and

becrefary Manning's demand for the resignation of Charles thesioy of New Hampshire, who for years has been the efficient solicitor of inter-nal revenue and not at all a politician came like a shock to the entire department, which is now convinced that Manning will make a cl-san eweep, just as far as he dares to go.

Parid A. Wells finds in his visit to Mexico tast sugar's higher there than here, and that neither the to racco nor the sugar of M' x co will compete with ours, and now he advocates recipro-

*TOO YUEH FIRRIHING *

Not doing ago an Inlian stated one of our large differs and after gazing about in a howder direct state of mind, he expressed his sense of the situation is saying. Thou much houses, too much house also the first house the first house two for the return distribution of the second of the first house two for the return distributions. much people, the much warons, too much noise, too much worthing? In this épaculation it ere is an almost perfect description of the condition of tusiness that has existed through-out the world for the plat year. There has been more wheat than could be caten, more right fran could be worn, more from their could be used, more ships and more railrouts than the carrying hade of the world demanded, and, in n ost of the funggal centers, more money than tackett could be profitable an cloud. In about them, could be profitably employed. In short, there was 'too much everything ". In this country it has been the effort of some newspapers and public on akers to personale the people that the existing business it present is due to the protective tariff | but in Progland, where the manulacturers are not protected by a tariff tax, the situation is as tad as it is in this country, if not worse. Many of the largest cotion mills in England have been running only four days in a week during fie winter, and merchants who ship to the great awithdraig markets base only with very great inheulty kept thems twee from

The ship building industry in Fagland has The total tomage hunched luring the year 1854 was fall of tons, as against 1.115.565 tons in having turned cut 112,700 tons less than in 1883, the Type, 92,350 tons less, and the Tees, 89,200 less. The Clyde shows a decrease of nearly 119,000 tons from 1883, but as this is divided between some fifty firms, the depression though severe, has not been felt as severely as on the to have been the subject of parliamentary discusses, andthe object of charlty subscriptions throughout the country I was estimated at the beginning of this year that left less time 50,000 mm, who had been employed in the ship pards of the United Kingdoin, were out of work in the last semi-annual checker of H E Moss & Co, brokers and contracting for be sale, purchase and construction of steamships, whose offices are in London and I recipool, it is stated that the output of new togrange would not have reached anything like its present total, had it not been for contracts made in [888, which builders had in hand at the commencement of the year, and that the

at the commencement of the year, and that the output for 1835 will show a considerable decrease, as scarced; any stances are building, except for special purposes.

Freights, they say, "cannot be said to have improved, and owners find it more and more difficult to keep ressets employed in any trade yielding a profit there is, however, the probability that the government will require to keep many thousands of tons of shipping employed in conveying in dilary stores, railway materials, etc., for the service of our armées in Egypt and the Soddan, pribably, for fully twolve months."

This subject is treated at considerable length in the report of Cansul Janues of Cardiff to the state department a Washington, who says that state department a Washington, who says that the past year. The high dividends yielded by the past year. The high dividends yielded by shipping property during the prosperous years induced production of tomage in excess of requirements of trade. Overproduction was also accelerated by the French bounty system. In summing up the causes of depression, Mr Jones says. "It will be seen that tomage has been produced first, to theet the natural requirements of commerce, second, to satisfy the demands of moneyless adventurous managing owners, and third, in resource to the stimulations." owners, and third, in response to the stimulating influence of a French bounty law, which offerred a premum mon the landing and sating of slopp." At the same line the ocean traffic of the world materially decreased during the last year, in consequence of the decreased demand

for imported grain in Europe, and for the finished products of England in other fands. While it is d ublies true that the overproduc-tion of many manufactured articles in this country has been due to the stimulus of protection, there seems to have been too much of everything the enterprises that have alread; outdone themselves Gineral Batter suggested in some of his campaign speeches last fall that what is needed is not less production but more consumption He did not, however, explain how this remedy should be applied. It is true, of course, that conspurption increases with the progress of civiliza-tion. The more highly civilized a country is the more it will consume. The effort of Great Britain to acoutre colonial possessions in different parts of the world and re use them to chilization has been prompted by a desire as well as a necessity of increasing the d mand for her manufactured products. France and termany are now pursu mg a similar police for the same reason. It is only the suvage who keels crowded in the busy centers of civilization. His wants are so himited 11 at the essential requirements of the civilized man are too much for him. While italist and manufacturer unight profitably heed. regious that consumption is increased. By the improvement of the condition of the masses in civilized lands it is far more moreased. The envirged lands it he har hore increased the general and permanent prosperity of the great Lusiness suterprises of the world depends less upon their large accumulations of capital than upon the wide influsion of profits among those who contribute to their making. While there is too much of almost everything, there is not yet enough community of interest between the rich and the poor in this world

I nder the heading of "important notice," the New Orleans Duthy State publishes a double-leaded color alto inform the people of that city what I says "seeins to have escaped their attention, that for many weeks nast there has been in our midst a world's exposition." It is moved to do this from the fact that on the day previous the gate receipts were only \$2807, a most putital showing." On this subject the New York Frahune remarks "If the people of New Orleans won't expend fifty comb such to see an exposition on which the government has spen nearly two militons of dollars, how did they expect to attract distors from the north at a 10. penditure of hundreds of dollars such, with all the discomforts of life in the Crescent City?"

Last summer the Manchester, N H , Marr or Last summer the Manchester, N. H., Marrir railed continually against the folly of any attempt to substitute business methods for the old fashioned spoils system in politics. But now, olisorving the calminess with which President Cliveland ignores petitions and sufficient on the shole approving his determination, the Mirrol is constrained to say. All this may be good for the country, but it is very exasperating to people who want to be postmasters and colto people who want to be postmasters and col-lectors at once. It may help Cleveland, but it butte the faithful. It may even help the democ-rity in the end, but it is very bitter medicine to lake.

from him. She has two little cultures and receivery measy at the nonapperiance of her husband. It is probable that he will come to the front before long. He could not tell exactly when his family would arrive be him and is writing to hear from them. However it is an uralessant situation for the lady and she cannot he feeling auxious. Perhaps the notice will rich the eye of Mr. Bray, who will find his family at the Quarrhy Later.—Mrs. Bray received a telegram late last might from her husband we will be on hand in due time.

ST. HELEN'S HAR IMPROVEMENT—A little brush work is being done on the dyke at St. Helen's ber for the purpose of puting the work begun las year by the government in the best possible condition for a long suspension of operations. It is specially to be regreted that the last congress the not possible two many strength and have been done during the present sine weather. Indeed, so favorable an early spring has never been known But it is the same old story. The engineers have never strated m on a plan for a permanent improvem at that wis not balked by want of appropriation, and at no time has eaougn money been voied at one that to one thing well. There is no probability of an appropriation until the fall of 1855, and the only thing to be done is to drege. ST. HELEN'S BAR IMPROVEMENT -A little

e had THE COLUMBIA JETTI.—Two barges recently THE COLUMBIA JETTI.—Two barges recently constructed for the government work at the mouth of the Columbia left here yesterday, one of them partly loaded with machinery and material. The money thus far appropriated will be used in building the necessary approach from Fort stevens to low water mark, which will be a trestic about 2500 feet long; constructing sheds, machinery and wharf—in short, preparing a plant ready for work whenever there shall be sufficient appropriation to commence on its jetty prover. It will not be possible under existing circumstances to accomplish anything in the way of practical results toward constructing the channel before the fall of 1887.

Alimond Emplezialers Released in —The two

ALLMOND ERBEZLEHS RILEASIN — The two men, who gave the names of A. J. Wilson and A. Laphan, who were arrested a few days sides by Chief of Police Parish on a telegram from Calef Crowley of San Francisco vere yesterday discharged Thin custody. It seems that the gevernor of California refused to grant a requisition on the chowing made by the firm who accused those men of embezzlement. They gave no the crooks they were changed with conficulting and were set at liberty, and say that when they get fack to Sat Francisco there will be a suit for damages brought against the firm was caused their arrest and imprisonment here. A BAKING POWDER TRICK

All kinds of schemes and tricks are resorted to by unprincipled persons to obtain unfair ad-vantages over their neighbors. The latest and most dishones, of these that has come to our notice is one by which certain manufacturers of sumers against the use of other brands that have an established reputation as the heet and pure stim the laurket, for the purpose of introducing their own. Their method, we have informed, as to heat a can of baking powder of a well-known brand over a lamp or store, when, if there is a gas given off having the odor of summonia, the powder is condemned as being made of animenia and unit for use. The prejudices of the unsuspecting are thus excited against the baking powder submitted to the socialist the baking powder submitted to the socialist the hand suffers a serious loss in consequence.

of it on hand suffers a serious loss in consequence.

If the middle gent consumer will stop a moment to think she will readily perceive that this "test," if successful, proves nothing but the superiority of the baking powder tested. The sim of all haking powder makers is to produce an article that shall most readily, under use, a ver off its leavening gas. The powder that does this with a moderate heat, at the same time evolving the largest quantity, is scientifically the best.

evolving the largest quantity, is scientifically the best.

There is probably not an article prepared for food that cannot be manipulated to prove that something is wrong about it and when a person goes into a bitchen or before a housekeeper who is jot to be presumed to understand chemical relations, and performs an experiment of even the simplest character, it is not difficult to impress one that something awful is the matter. As to haking powders, we could suggest a dozen test that would be as indiculous in giving a fair idea of their relative merits to an unotstructed infind as the ore here mentoned.

The true domestic value of a baking powder

idea of their relative merits to an unobstructed initial as the ore here mentioned.

The true domestic value of a baking powder consists in its parity, wholesomeness and leavening power I is only the chemist, with his chemical applances, who can determine these qualities, scientifically and exactly. Aside from this, the best test for a baking powder is to try it in making bread, and see which makes the most and the best. To this practical test all the established brands have been put, and housekeepers have very generally made up their minds which hey prefer, and the tricksters will find utilimately that a brand that has been a household favorite for years will not be dispinced by reason of any tricks which they may show

By Louis Republicon. Pearson's nomination is not so find a victory for evil export if form as it is a result and not a very surprising one flowing in the neition of certain New York republicant hist volumber. ir in the netion if certain New York republicans hist Norember.

Indianapolis Journal. The contrast between the gayeties at Berrino or the occasion of the animer stry of the birth of bismarck and the integral feeding of sorrow in this pointry because of the latel filmess of Grant, is starting.

Minneapolis Tribine. The Illinois tegrislature is getting to be more of a bore than the Swalin court martial was or the trouble in the Swalin court martial was or the trouble. In the Swalin court martial was or the fronds. In this work stoped shorter than the fruings lock of the grantparent. New York Herold. Some people think that party politics are gloomily chaotic white inheritair falking of a political militarium close at hand. In our judgment Mr. Cheviand stands between the two octrimes with my partion in the country on his side.

try on his side.

(incumnal commercial Gazette It is a forth mate thing for the press out that the complete master rolls of the Confoc ate army are preserved among the roll forthermore we Assimitation relationship to the roll of the master speed in pickin, out needs the men for cort I interstone consulships, and such like

PRESS PITH.

'The west to trade is in to the save a photosophic. No but let a monard relate in argument on that basis and see whe he comes out — Boston Peet on that basts and see whe's he comes out "Boston Post".

We the Afghan with all lent disturbances in India threatens a corner 1 hipopolanal lions and Bringaltigors. People in take the hint and hip corner of these articles will take the hint and hip corner of these articles will when a hapy begins to ask questions wise men take their departure. A '2 year-old' can run the profounder's scholar to ground to be minutes. One of them recently examines, the eyes of his sister and asked. 'Minutina where does the Lord get his blue dust from? "Marci (Ga | Polograph.

They invited Hill Perkins, to becture in a western town where almost ever other citizen was down with the sun dipos, and be took in sea misual. He shouldn't field about si he a reatter. There had bright his corner preparation as it of jokes on the level.

From the result Shows in a distribute the section of the name of the real first that the section of the real first that the section of the real first that the second has been secured of the section of the real first that the second of the section of the second of the section of the second of the section of the second of th
